

AXLE LED

WALL ASYMMETRIC INDIRECT

DESCRIPTION

Axle is an elegant and compact LED linear accent luminaire providing efficient asymmetric light distribution. Softly curved, Axle measures just 2 11/16" by 3 11/16". With adjustable optics, light output from 350 to 1200 lumens per foot (nominal), and efficacy up to 126 LPW, Axle delivers smooth, effective indirect illumination. Highly flexible, Axle can be installed as individual luminaires (up to 8') or in continuous runs. LED boards and on-board driver are accessible without removing the luminaire.

OPTICS

ASYMMETRIC PROJECTING OPTIC (APO) -

Cartridge-mounted, linear LED arrays are paired with precisely formed semi-specular reflector for smooth light distribution and a 95° beam spread. The LED array is protected by a clear acrylic cover. In an indirect orientation, peak intensity occurs at 120° above nadir with a peak-to-zenith intensity ratio of 5.2:1.

Field Adjustable Aiming (15 options)

The Axle housing can be field rotated to provide either indirect (ceiling) or direct illumination. Detents in 15° increments permit precise aiming.

LIGHT SOURCE - LED

Custom linear array of mid-flux LED's are cartridge-mounted to facilitate service and thermal management. Available in 3000K, 3500K and 4000K with a minimum 80 CRI and an option for 90 CRI with elevated R9 value. Color consistency are maintained to within 3 SDCM. LEDs operate at reduced drive current to optimize efficacy and lumen maintenance.

All LEDs have been tested in accordance with IESNA LM-80-08 and the results have shown L80 lumen maintenance greater than 60,000 hours. Absolute product photometry is measured and presented in accordance with IESNA LM-79, unless otherwise indicated.
