

POLY

Poly triangle pendant, Poly 2x2 recessed drop & Poly Y wall

POLY

A new geometry in LED luminaires

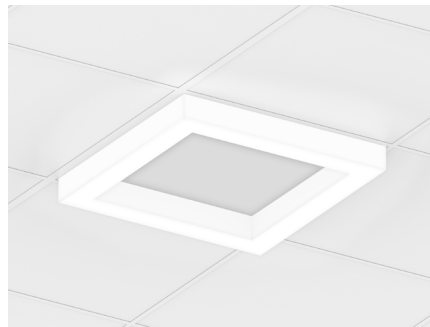

Poly Recessed

Poly is offered in 1x1, 1x4 and 2x2 sizes and with either regressed 2-sided diffusers that form a shallow coffer, or 3-sided diffusers that drop below the ceiling.

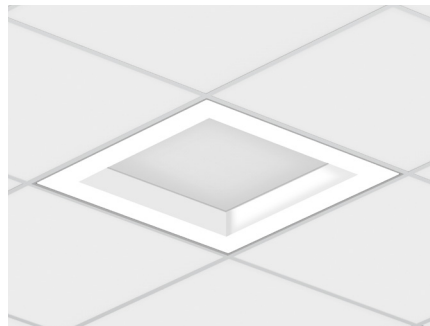

As a modular recessed luminaire suitable for open or private offices, a Poly 2x2 can provide from 2500 to 4500 lumens.

Poly introduces a new geometry in LED luminaires with intriguing geometric forms and crisp luminous elements. Appropriately scaled for use as discrete luminaires, Poly offers creative options for both decorative and general lighting.

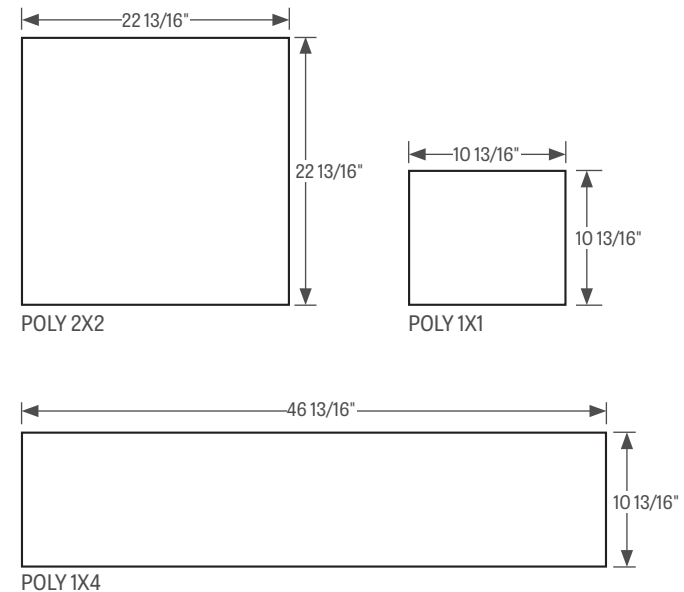

- Pendant, surface, and recessed luminaires
- Uniformly luminous elements
- Crisp 2.5" profile
- Fully lighted, mitered corners
- Practical performance: up to 126 LPW and 1400 lumens per foot.
- Full range of electrical and control options

UTILITY PLATES

Recessed Poly features a center utility plate that subtly integrates air return diffusers, as well as third-party connections, such as sprinkler heads or speakers by others.

LUMENWERX

Imagine a different way to shape light

As pendant, surface or wall-mounted luminaires, Poly offers rectangular, triangular and Y-shaped configurations, which can distinguish a variety of special areas. The open forms are airy (drivers are remote) and can easily take on regular or free-form arrangements. Energy-efficient operation with 18% to 30% uplight and a wide range of electrical options make Poly both attractive and practical.
