

**1 SINGLE FIXTURE**

Slide the slip ring (A) and the canopy (B) onto the stem (C) and leave some space. Screw the junction box crossbar (D) onto the stem (C).

**2**

Screw the stems (C) onto the nipple at the ends of the fixture (E).

**3**

Raise the fixture and tighten the junction box crossbar (D) with screws (by others) to the junction box (F). Then slide the canopy (B) and thighten the set up with the slip ring (A).

**4 CONTINUOUS SYSTEM**

For a continuous system, repeat steps 1 for all mounting hardware.

**5**

Remove the covers (G) on both sides of the fixtures with the included lens tool.

**6**

Screw the stems (C) onto the nipple at the ends of the fixture (E).

Drawing of a non power junction box in the ceiling

Raise the fixture and tighten the junction box crossbar (D) with screws (by others) to the junction box (F). Then slide the canopy (B) and tighten the set up with the slip ring (A).

Install the aircraft cables on the first fixture. Then install it on the second fixture (as shown in step 4). Remove the screw (H) on the joiner and put it in a safe place.

Join fixtures using align pins as guide. Put back in place the provided screw (I) (using 3/16" Ball-End Screwdriver provided). Tight the screw (I) to pull the extrusions together. Repeat steps 5 and 6 for all others fixtures in the run.

Re-install covers (G) by simply pushing in the extrusions until it snaps in. (push evenly to prevent from damaging the covers).
