

NOTE: Wire dimming conductors as Class 1

1

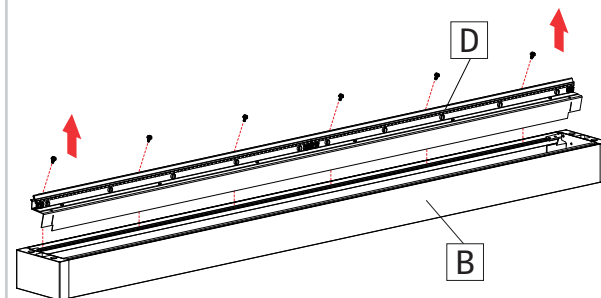

Remove dust cover (A) from the fixture (B).

2

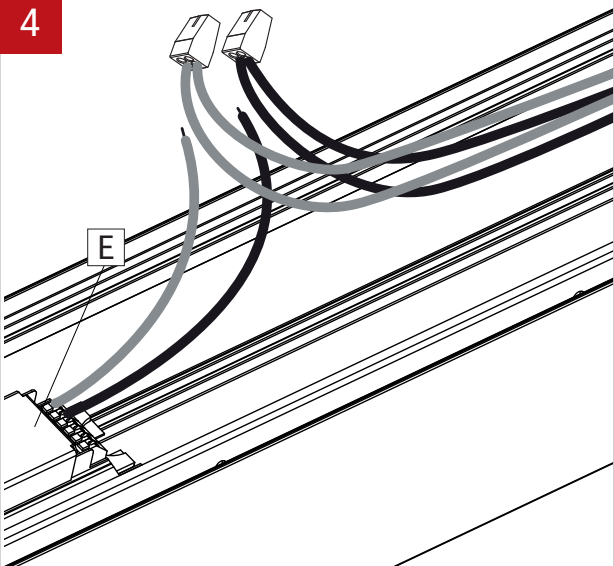

Disconnect LED mox connectors (C) by taking a pointed object and pressing on the two tabs on the top.

3

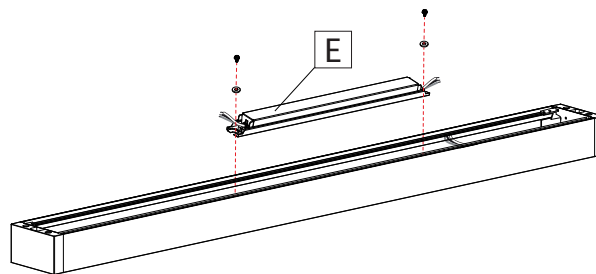

Unscrew the side reflector (D) and remove it from the fixture (B). Place the side reflector (D) in a safe place.

4

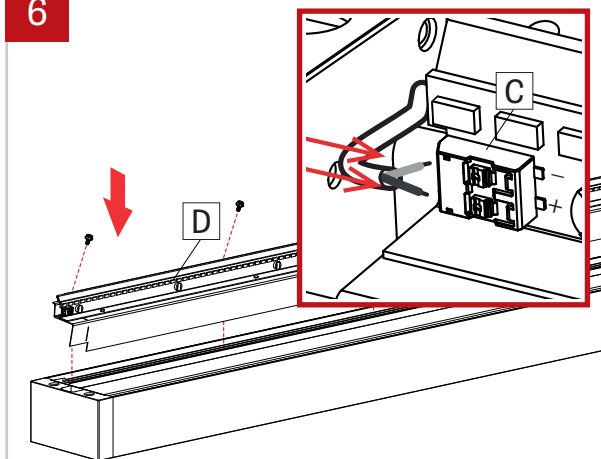

Disconnect wires from the driver (E).

5

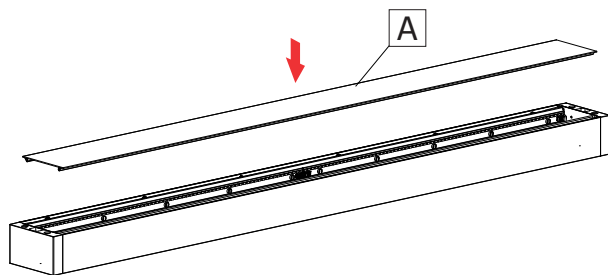

Unscrew the driver (E) from the fixture. Replace the driver and make electrical connection.

6

Reconnect LED mox connectors (C) to the side reflector (D). Reinstall the side reflector (D).

7

Reinstall the dust cover (A) back in place.
