

NOTE: Wire dimming conductors as Class 1

1

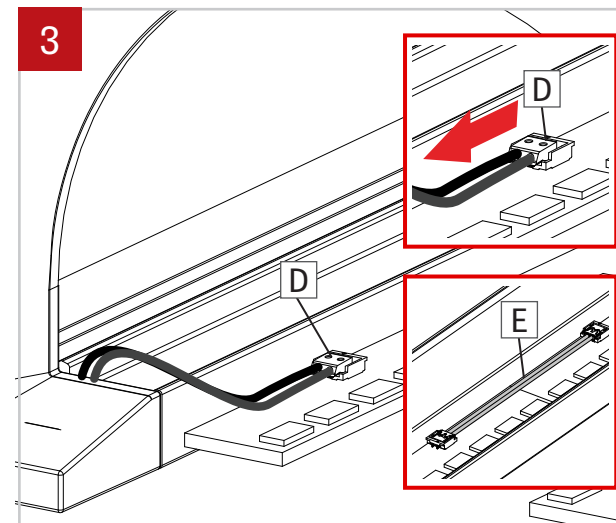

Make sure the power to the fixture is turned off. Remove the lens (A) on both sides using the provided lens tool (B).

2

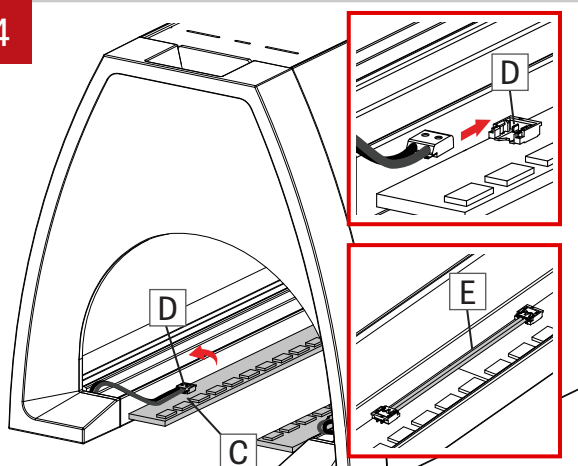

Remove delicately LED Boards (C) from the extrusion.

3

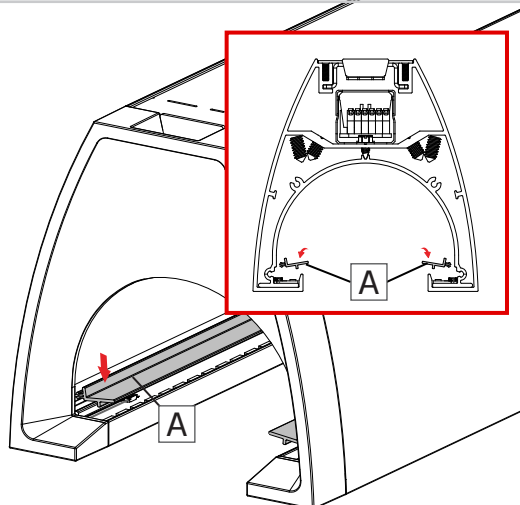

Disconnect LED mox connector (D) by pulling it. If need to remove just one board, disconnect coupler wire (E) between the two board by pulling it.

4

Replace the LED Boards (C) and reconnect the LED mox connector (D). Reconnect coupler wire (E) between the two boards (C). Put the LED boards (C) back in place (LED diodes inwards). Make sure the wires are not hiding any LED diodes.

5

Reinstall the lens (A) back in place by pushing it.
