

NOTE: Wire dimming conductors as Class 1**1 SINGLE FIXTURE**

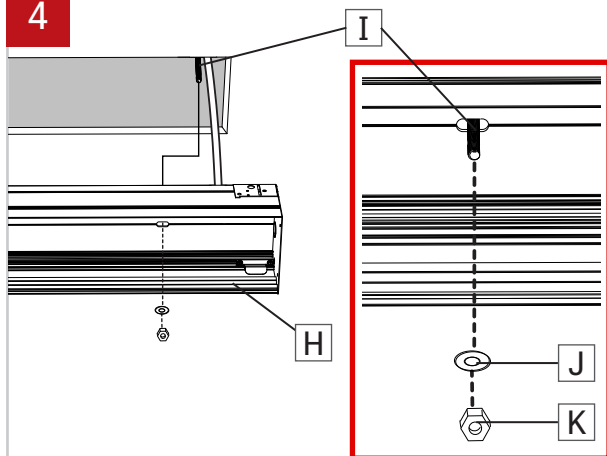

Prepare the area where the fixture is going to be installed. Cut hole in the drywall according to the dimensions [*] in the client drawings.

2

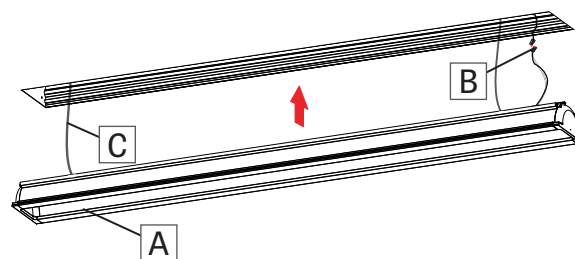

Remove reflector [A] from the extrusion. Disconnect quick connectors [B] and remove security cables [C] in order to remove the reflector [A]. Place it in a safe place.

3

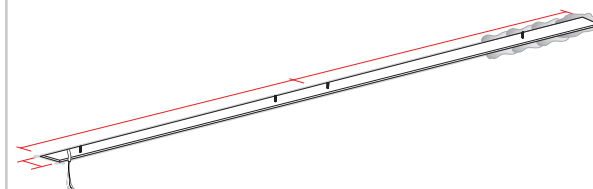

Install power cable [D] (by other) through the BX connector [E] (by other) and install onto the power plate [F] provided. Make electrical connections between power cable [D] and fixture cables using electrical marettes [G]. Reinstall the power plate [F] to the fixture [H]. Insert fixture into pre-cut hole in drywall.

4

Insert fixture [H] into pre-cut hole in drywall, aligning threaded rods [I] with holes in top of fixture [H]. Put washers [J] and tighten nuts [K] to secure the fixture [H].

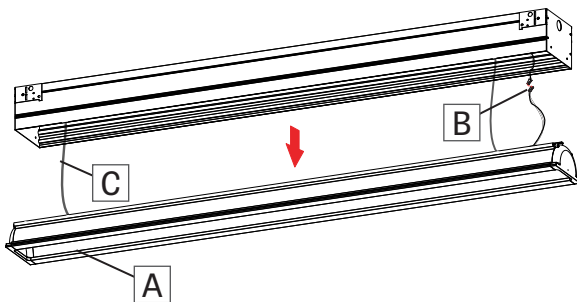

5

Reinstall security cables [C] and reconnect quick connectors [B]. Reinstall reflector [A] inside the fixture.

6**CONTINUOUS SYSTEM**

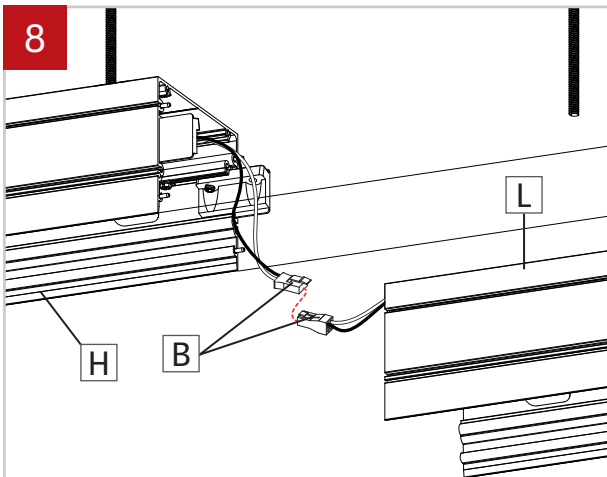

Prepare the area where all the fixtures are going to be installed. Cut hole in the drywall according to the dimensions [*] in the client drawings.

7

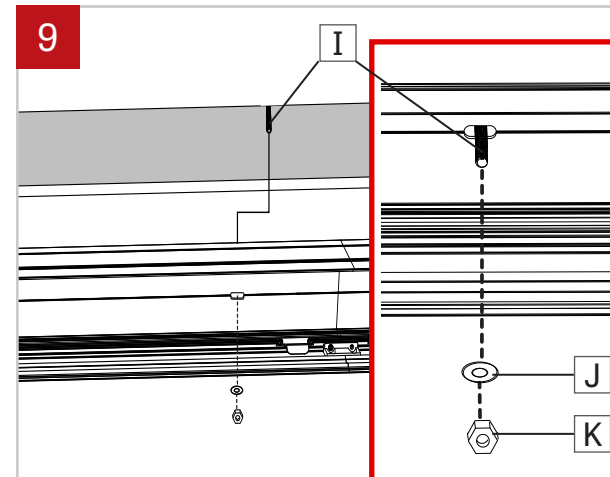

Remove reflectors [A] from the extrusion. Disconnect quick connectors [B] and remove security cables [C] in order to remove the reflectors [A]. Place them in a safe place. Repeat for all fixtures in the run.

8

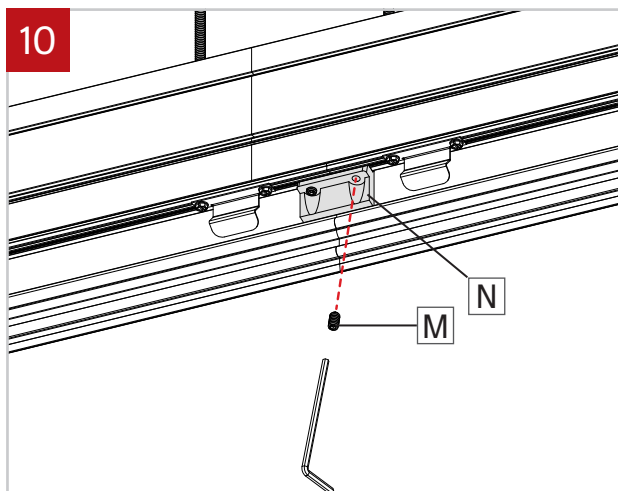

Apply steps 3 and 4 to the first fixture [H] in the run. Make wires connection between fixtures [H] and [L] using quick connectors [B].

9

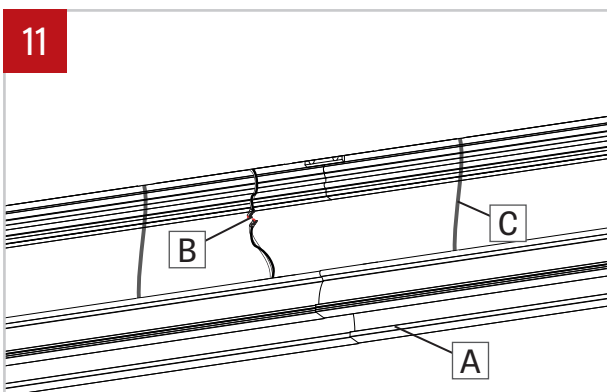

Align threaded rods [I] with holes in top of the fixtures. Put washers [J] and tighten nuts [K] to secure the fixtures.

10

Tighten the set screws [M] on both joining brackets [N] using Allen Key to secure the fixtures together.

11

Reinstall security cables [C] and reconnect quick connectors [B]. Reinstall reflectors [A] inside the fixtures.
