LUMENWERX

Project:

Type:

DESCRIPTION

The Dot, Box, and Dot Cylinder are individual mounting systems that can be used on their own as solo lighting fixtures, or they can act as complements or supplements to Pivot track systems on a larger scale. Designed to be surface mounted on ceilings or walls, they are equipped with flat, conduit feed, or direct mount canopies, which can be round or square. See separate spec sheets for details.

Order Guide

* PoE (Power-over-Ethernet) compatible. Consult factory for details. * Available with 120V only. * Consider compressioning is required.					

⁶ On-site commissioning is required.

⁷ For emergency battery, code will be like the following example: **RD1+EB**.

LUMENWERX

Technical Specifications

OPTICS

CircaFlex[™] Optic

The CircaFlex[™] Optic, at just 1.2", uses advanced beam-splitting technology to allow light to follow an intended optical path with maximal precision, minimal spread, and even distribution.

LIGHT SOURCE - STATIC WHITE

Compact COB (Chip-On-Board) LED module, available in 2700K, 3000K, 3500K and 4000K with a choice of 80 CRI, 90 CRI, or 95 CRI, with elevated R9 value for 90 CRI and above. Color consistency is maintained to within 2 SDCM. All LEDs have been tested in accordance with IESNA LM-80-08 and the results have shown L80 lumen maintenance greater than 60,000 hours. Absolute product photometry is measured and presented in accordance with IESNA LM-79, unless otherwise indicated.

LIGHT SOURCE - FULL SPECTRUM

The full spectrum LED option offers improved color particularly in the cyan region that is beneficial in both healthcare and circadian lighting strategies. The cyan region in full spectrum LED is richer at the 480 nm range.

WELL for Light - The WELL building standard focuses on light

fully attributed to the construction and features of a luminaire.

In WELL V1, it's Feature 54 Circadian Lighting, Feature 55 Glare Control, and Feature 58 Color Quality. In WELL V2, it's Feature L03

Circadian Lighting, Feature L04 Glare Control, and Feature L07

All LED drivers used at Lumenwerx are deemed to have a low risk

level of flicker, of 5 % or less below 90Hz operational as defined by

- Feature 54 or L03 when full spectrum LED is selected - Feature 58 or L07 when 90 CRI or above is selected

quality in several features. There are three categories that are

Electric Light Quality.

This fixture meets Features:

IEEE standard 1789-2015 LED.

in a space to assist the mind.

CONSTRUCTION

PoE

ELECTRICAL

ECOdrive 0-10V

Housing: Die-cast and extruded aluminum.

CERTIFICATION

ETL - Rated for Indoor Dry/Damp locations. Conforms to UL Standard 1598 and certified to CAN/CSA Standard C22.2 No. 250.0.

WARRANTY

Lumenwerx provides a five-year limited warranty of electrical and mechanical performance of the luminaires, including the LED boards, drivers, and auxiliary electronics. Lumenwerx will repair or replace defective luminaires or components at our discretion, provided they have been installed and operated in accordance with our specifications. Other limitations apply, please refer to the full warranty on our website.

For more information, please contact well@lumenwerx.com

WELL for Mind -This luminaire meets WELL for mind as it is a

human centric luminaire offering quality light, excellent color, and smooth optics. If any of these features are incorporated in

a luminaire, it can improve the ability to focus, concentrate, and

persist longer on a given task. This fixture harmoniously operates
