Volumetric light redefined

LUMENWERX

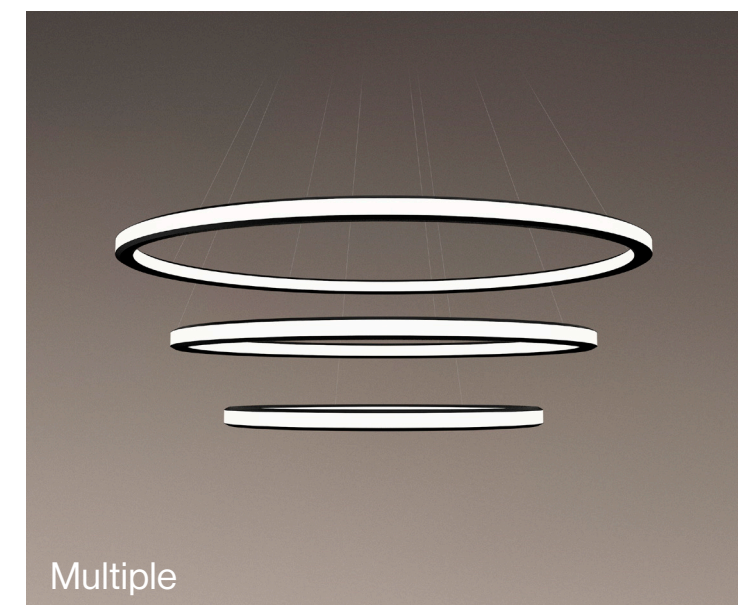

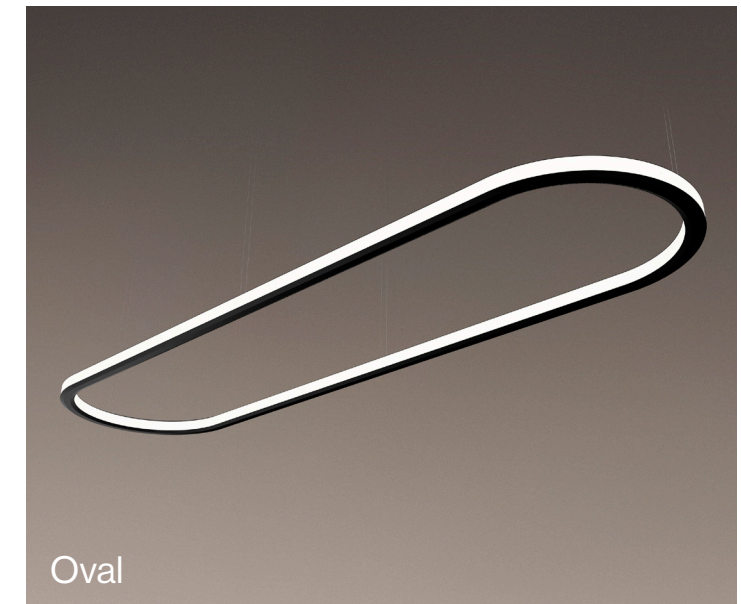

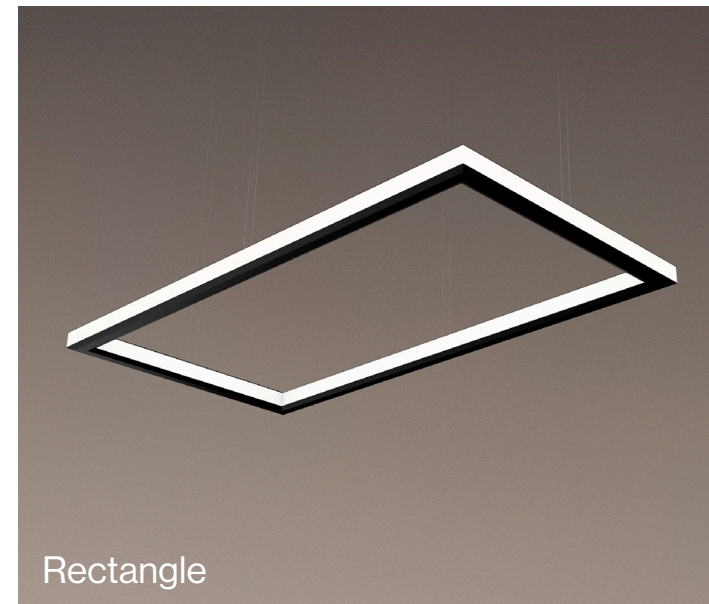

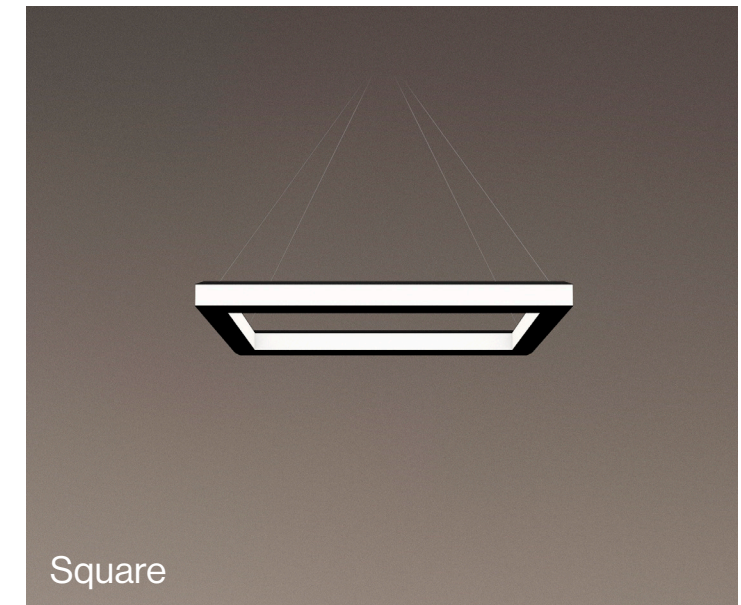

Presenting Elia

Volumetric light redefined

Light speaks volumes through Elia, a family of decorative luminaires with LED arrays illuminating both inward and outward from housing offered in round, square, rectangle, oval, and multiple shapes, and in sizes ranging from 2' to 8' diameters.

Elia's simultaneous inward and outward distributions create distinct volumetric light, perfect for making a statement, enhancing a style, inserting a focal point, or adding character to a space. With Elia, both the luminaire and the light it casts become key elements of an interior design.

- 4 shapes + multiples
- Up to 8'
- Elegant integrated **power-over-aircraft** cable option
- Static White, Duo, Sola and Quadro
- Volumetric light

Elia Square lights the way to designing an efficient open floor plan.

Featuring **Elia** in Rectangle shapes accompanied by **Aera** 3 inch round recessed and **Pivot** track with **Dot** modules.

Elia

Optics & Performance

Elia offers a decorative flair to architectural spaces all the while enhancing them with an abundance of illumination. The lighting family provides volumetric light that distributes widely, creating rich luminous spaces without the shadowing sometimes caused by certain direct/indirect luminaires and inward-position lenses. Elia offers up to 93 lm/W, yet maintains an impressive CRI of 90+.

Volumetric inward and outward

Not only a luminaire,
but also a work of art.

Featuring **Elia** in round in single mounted and multiples with **Via 2** recessed on the right side.

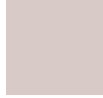

Offering at a glance

With 4 shapes and multiples (fixtures composed of two or three sizes of the same shape), the Elia family has the design flexibility to make an impact in a wide variety of settings.
