Shapes and Sizes

Fortex offers a coordinated range of luminaires for pendant and wall mounting, available in sizes ranging from 18" to 48". Consistent proportions and detailing allow the collection to scale across a variety of architectural applications.

Each luminaire is formed from 4 ¼" x 1 ½" extruded aluminum channels, finished with illuminated optics that extend ½" beyond the housing. Corners are mitered and fully luminous, creating a clean, continuous expression. Standard white and aluminum finishes are available, with custom colors offered upon request.
