# Hex

THE CREATIVE SIX-SIDED LUMINAIRE

**FEATURED PRODUCT**

HEX3PD—Pendant with 3 Direct Cells  
HEX3PI—Pendant with 3 Indirect Cells

**FEATURED PROJECT**

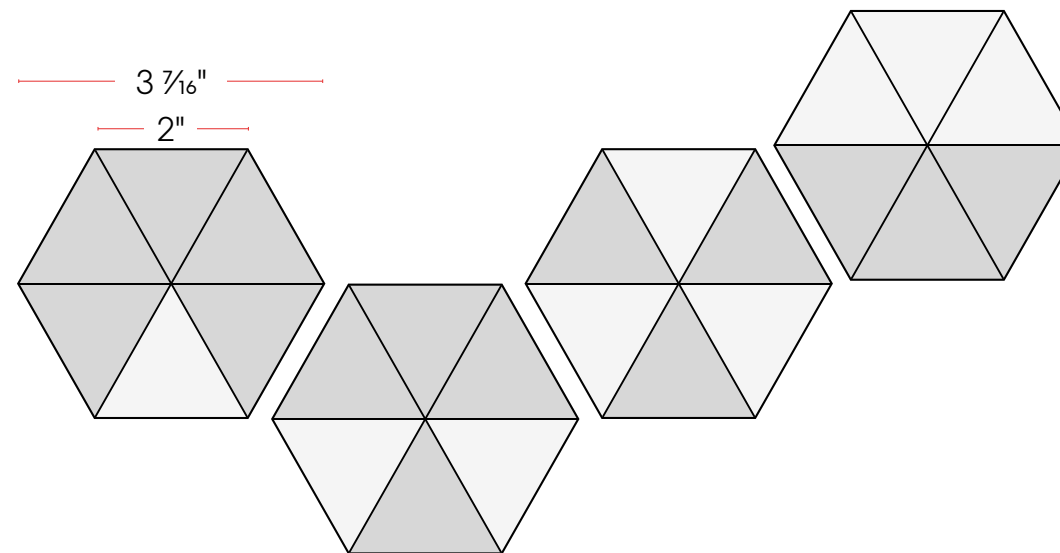

Campari America  
Manhattan, New York City, U.S.

# Hex

Hex is a distinctive and flexible six-sided luminaire designed for creative applications. Select from nine standard configurations of one-to-four luminous cells. Cell configuration determines the light distribution, from direct to indirect and all around. Each cell is illuminated by its own LED array with consistent light output and brightness across all cells.

The 2" wide panels—luminous and opaque—snap into the core armature, providing a nearly seamless transition from cell to cell, as well as access to LED arrays and the driver. Cast endcaps support suspension cables and assure crisp detailing. Hex is available in sections from 2' to 12', and can be installed as a discrete luminaire or continuous run.

**DISTRIBUTIONS**

Direct, Indirect, Semi-direct, Semi-indirect and direct/indirect including ultra widespread beams

Distinctive  
Hexagonal Profile

3.4" H x 4" W

**LIGHTED CELLS**

From 1 to 4 cells with one or two circuits. The number of lighted cells determines total light output.

Multiple  
Control Options

2" Wide Cells

**CELL CONFIGURATION**

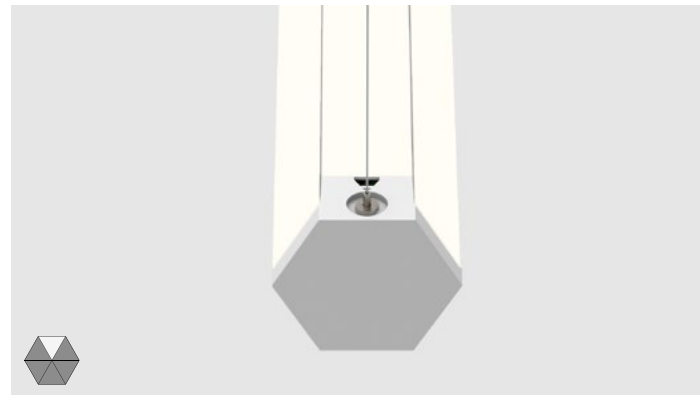

Determines light distribution from a medium beam direct or indirect to light all around.
