LAYOUT

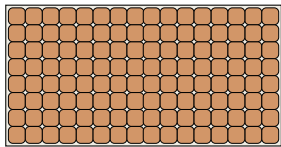

Define the overall layout of your Loom Luminous Ceiling.

STANDARD

Standard layouts are specified by total nominal L x W

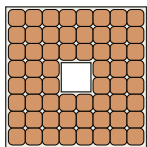

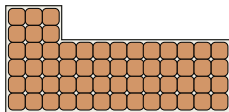

Square

Rectangle

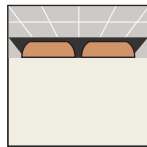

CUSTOM

Reach out to us for non-standard layout shapes.

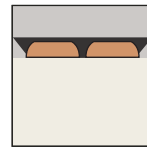

MOUNTINGS

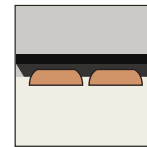

Recessed Drywall, Direct Mount, Suspended, and Direct Mount Wall use the Loom Frame, boxing in the layout with T-bars by others. Recessed Grid can be installed without the Loom Frame, with T-bars by others.

INSTALLATION NOTE

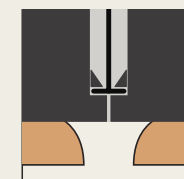

Loom luminous cells come pre-installed on panel housings, with standard panel size of 24" x 24".

Panels smaller than 24" x 24" are used to complete arrays as necessary

Loom panels install on 5/8" T-bars (by others), creating a seamless layout

Loom's modular layout and installation easily accommodate building system integration.
