With the same crisp and clean aesthetic as its Mini Pivot Track counterpart, Mini Pivot Linear fixtures are track-free lighting units that can be used in conjunction with Mini Pivot Track modules in comprehensive lighting designs, or they can serve as lighting solutions on their own for applications requiring uniform and consistent lighting effects throughout a space. Recessed, surface, or pendant mounted, Mini Pivot Linear delivers direct light distribution with HLO (High-Efficiency Lambertian Optic) or Prism lensing options.

Mountings

RECESSED

Mini Pivot recessed is a small track system that doesn't take up much plenum or wall depth at just 1.5 inches, Mini Pivot recessed can be fitted into walls or ceilings with ease.

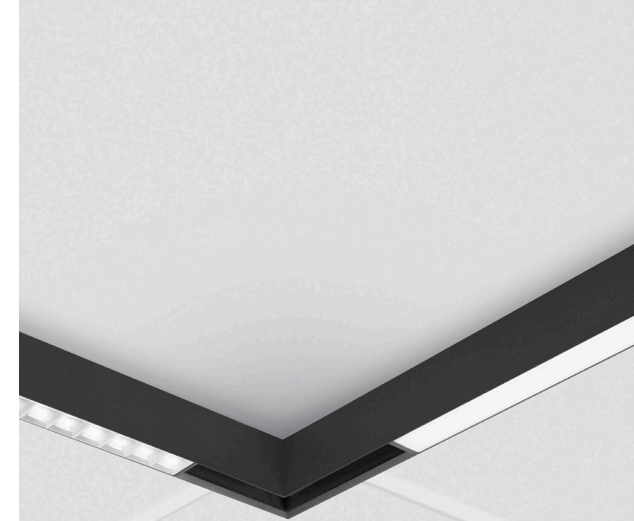

WALL TO CEILING

Mini Pivot Recessed Wall to Ceiling offers clean corners on the vertical plane.

SURFACE

Mini Pivot surface is a small scale track system that uses Corner connectors to join tracks, offering added flexibility for creating patterns.

SURFACE ON GRID

Mini Pivot Surface on Grid is a lock and clip system that can move with infinite rotation and angles. Compatible with Tegular and other traditional grid systems.

PENDANT

Mini Pivot pendant allows for your modules and tracks to be placed in direct and indirect direction, adding dimension to an overall lighting design.

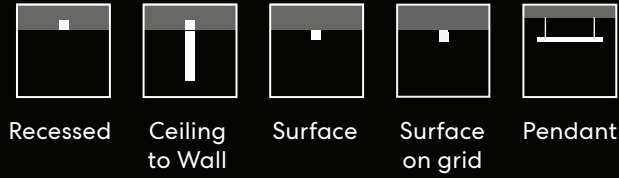

Throughout: Pendant mounted Mini Pivot
Linear Prism and HLO fixtures.

A symmetrical sequence of pendant mounted
Linears provides for a **comfortable, well-
balanced** learning space.

Mini Pivot

PRISM, HLO, BLANKS

The Mini Pivot Prism luminaire, equipped with our Diamond Prism Optic (DPO), emits a luxurious quality of light, soft and glare-free, wrapping around subjects with subtle graduated shadows.

The Mini Pivot HLO luminaire represents a premium everyday solution with its understated elegance and distribution of clean, uniform light with smooth beam edges.

Blanks are used to mask unlit tracks. With their unassuming appearance, they can enhance the visual interest of a space or quiet down an area. For precise fittings, they can be easily cut in the field.
