## INDIRECT OPTICS

## Widespread Indirect Optics (WIO2)

The Widespread Indirect Optic (WIO2) is a horizontal LED array with a widespread indirect micro prismatic optic that offers an impressive $160^{\circ}$ spread. WIO2 creates an even illumination for smooth brightness on the ceiling that can achieve uniformity ratios of up to 2:1.

## LIGHT SOURCE - LED

Custom linear array of mid-flux LEDs are cartridge-mounted with thermal management. Available in 2700K, 3000K, 3500K and 4000K with a minimum 80 CRI and an option for 90 CRI with elevated R9 value. Color consistency maintained to within 3 SDCM. LEDs operated at reduced drive current to optimize efficacy and lumen maintenance.

All LEDs have been tested in accordance with IESNA LM-80-08 and the results have shown L80 lumen maintenance greater than 60,000 hours. Absolute product photometry is measured and presented in accordance with IESNA LM-79, unless otherwise indicated.

## ELECTRICAL REMOTE

Remote-mounted driver is accessible through ceiling canopy and is provided with factory enclosure. Driver features factoryset adjustable output current with universal (120-277VAC) input. Dimmable from $100 \%$ to $1 \%$ with 0-10V dimming control. Rated life ( $90 \%$ survivorship) of 50,000 hours at $50^{\circ} \mathrm{C}$ max. ambient (and $70^{\circ} \mathrm{C}$ max. case) temperature. At maximum driver load: Efficiency $>84 \%$, PF>0.9, THD $<20 \%$. Other specifiable options include Lutron Hi-Lume 1\% (specify 2-wire or Ecosystem Dim-toOff), and DALI protocol drivers. All of our standard O-1OV drivers are NEMA 410 compliant.
