

POP RECESSED SQUARE

LED BOARD REPLACEMENT - INSTRUCTION

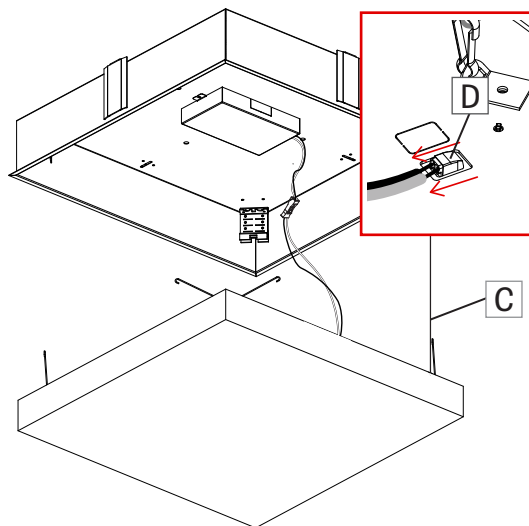

NOTE: Wire dimming conductors as Class 1

1 DROP

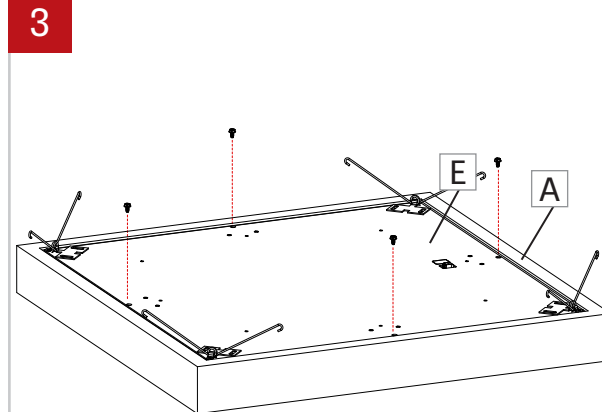

Make sure the power to the fixture is turned off. Pull down the diffuser (A) to get access to the springs (H). Squeeze the springs (H) to release them from the brackets (I). Once all the springs (H) have been released, slowly lower the diffuser (A) retained by security cable (C).

2

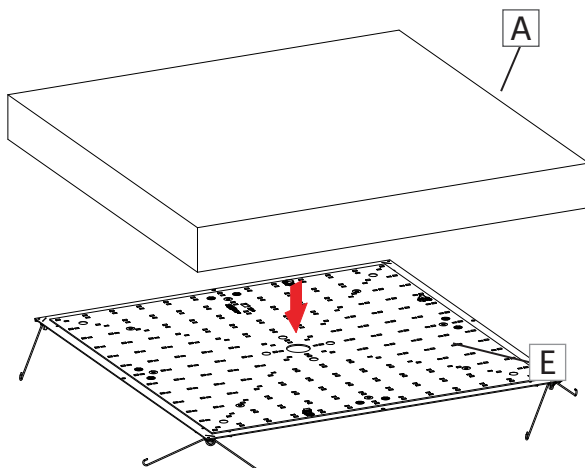

Disconnect wires from molex connector (D) (on LED plate holder) and remove security cable (C).

3

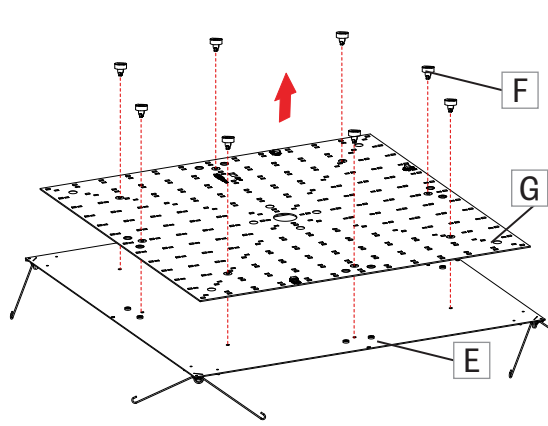

Unscrew the diffuser (A) to separate it from the LED plate (E).

4

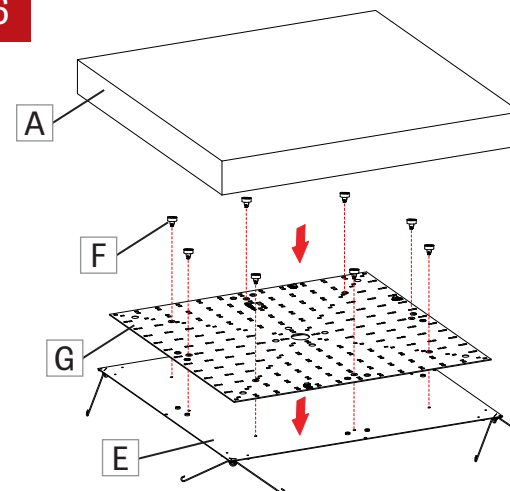

Separate LED plate (E) from the diffuser (A).

5

Remove push pins (F) on the LED board (G) to separate it from the LED plate (E).

6

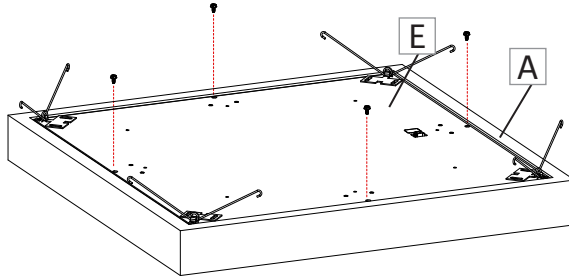

Replace LED board (G) and reinstall it on the LED plate (E). Secure it by putting back provided push pins (F). Place LEDs on the diffuser (A).

POP RECESSED SQUARE

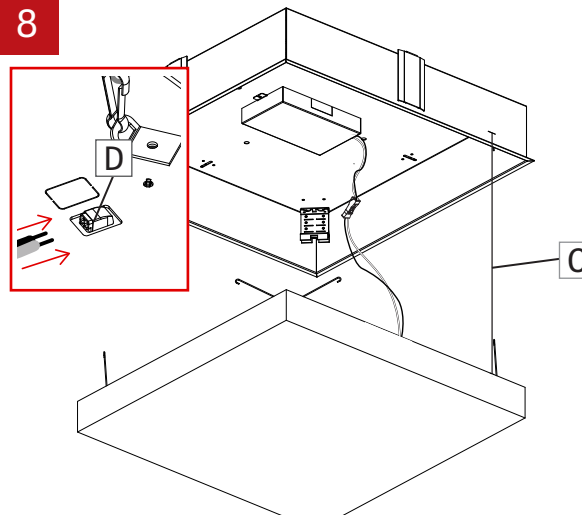

LED BOARD REPLACEMENT - INSTRUCTION

7

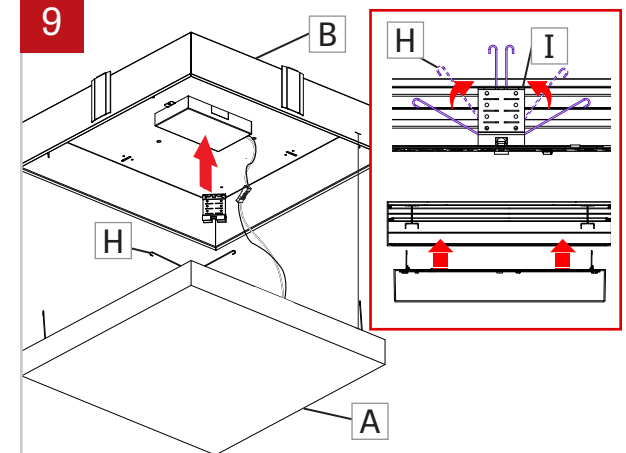

Screw back the LED plate (E) on the diffuser (A).

8

Reinstall security cable (C). Reconnect the wires from the driver to the molex connector (D).

9

Squeeze, align and insert the springs (H) into the brackets (I) that are further inside the housing. Once all the springs (H) are properly installed, slowly push the diffuser (A) in the housing (B) as far as the brackets (I) allow.
