Pivot Standalone

Pivot Standalones are individual mounting systems for the Pivot Dot, Box, and Cylinder modules. They can be used on their own as solo lighting fixtures, or they can act as complements or supplements to Pivot track systems on a larger scale. Pivot Standalones can be surface mounted on ceilings or walls, and are equipped with flat, conduit feed, or direct mount canopies, which can be round or square.

Performance

Pivot Standalone modules offer slightly higher performance than Pivot track modules. They are equipped with our CircaFlex™ Optic, which, at just 1.2 inches, uses advanced beam-splitting technology to allow light to follow an intended path with maximal precision delivering up to 1500 lumens. The Standalone Dot, Box, and Cylinders offer three beam angles: 20, 35, and 50 degrees.
