REMOTE DRIVER BOX - INSTALLATION

Shown with RDB18 (applicable for all sizes)

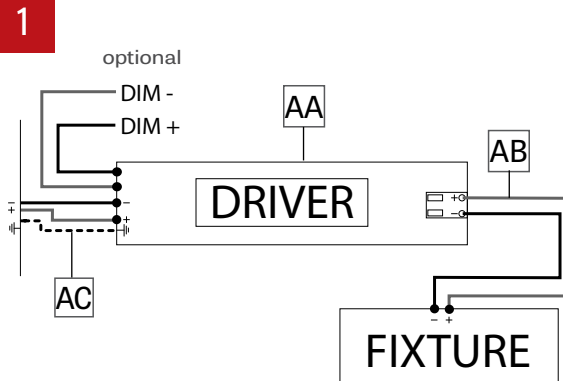

NOTE: Do not connect two or more power supplies in parallel. Ne pas connecter deux ou plusieurs blocs d'alimentation en parallèle.

NOTE: Wire dimming conductors as Class 1

This product must be installed in accordance with the National Electrical Code and all applicable local codes, by a person familiar with the construction and operation of the product, and the hazards involved. Proper grounding is required for safety.

Ce produit doit être installé suivant le code national de l'électricité, ainsi que tous les codes locaux applicables, par une personne familière avec la construction et le fonctionnement du produit, ainsi que tous les risques qui y sont associés. La mise à terre électrique est obligatoire pour la sécurité.

- AA- DRIVER BOX
- AB- PLENUM CABLE - By others
- AC- BX MAIN POWER CABLE - By others

Bring BX Main power cable (A) (by others) towards the remote driver box (B). Remove lid (C) and remove power knock outs (D). Secure the driver box (B) somewhere safe.

Pass and secure the BX Main power cable (A) to the driver box (B) using fittings (by others). Make wire connections between the BX cable (A) and the driver (E) using the wire nuts (F).

Pass the plenum cable (G) from the fixture through the driver box (B) using fitting (by others). Make wire connections between the plenum cable (G) (by others) and the driver (E) using the wire nuts (F) (by others).

Reinstall the lid (C) back onto the driver box (B) by using provided screws and star washers.

NOTE: Do not connect two or more power supplies in parallel. Ne pas connecter deux ou plusieurs blocs d'alimentation en parallèle.

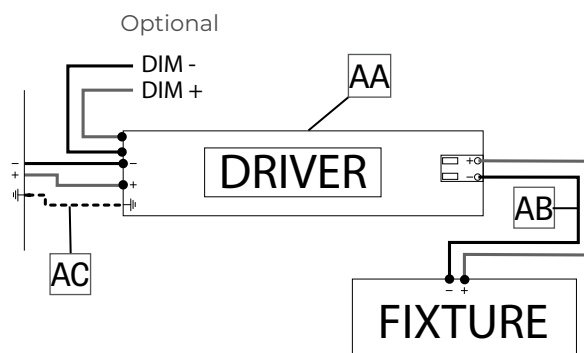

NOTE: Wire dimming conductors as Class 1

- AB- PLENUM CABLE - By others
- AC- BX MAIN POWER CABLE - By others

2 MULTIPLE DRIVER SCHEMATIC DIAGRAM

- AA- DRIVER BOX
- AB- PLENUM CABLE - By others
- AC- BX MAIN POWER CABLE - By others

3

Bring BX Main power cable (A) (by others) towards the remote driver box (B). Remove lid (C) and remove power knock out (D). Secure the driver box (B) somewhere safe.

4 SINGLE DRIVER SCENARIO

Pass and secure the BX Main power cable (A) to the driver box (B) using fittings (F). Make wire connections between the BX cable (A) and the driver (E) using the wire nuts (F).

5 MULTIPLE DRIVER SCENARIO

Pass and secure the BX Main power cable (A) (by others) to the driver box (B) using fittings (F). Make wire connections between the BX cable (A) and the drivers (E) using the wire nuts (F).

6 SINGLE DRIVER SCENARIO

Pass the plenum cable (G) (by others) from the fixture through the driver box (B) using fitting (by others). Make wire connections between the plenum cable (G) and the driver (E) using the wire nuts (F) (by others).

7 MULTIPLE DRIVER SCENARIO

Pass the plenum cable (G) (by others) from the fixture through the driver box (B) using fitting (by others). Make wire connections between the plenum cable (G) and the drivers (E) using the wire nuts (F) (by others).

Two knockout option should be used when multiple inputs or outputs are present.

On input side, multiple circuits must come from a single branch circuit.

8

Reinstall the lid (C) back onto the driver box (B) by using provided screws and star washers.

NOTE: Do not connect two or more power supplies in parallel. Ne pas connecter deux ou plusieurs blocs d'alimentation en parallèle.

NOTE: Wire dimming conductors as Class 1

1

Unscrew and remove lid cover (A).

2

Locate 4 mounting holes provided on the bottom of the driver box.
Install the driver box (B) according to local code with hardware provided by others (*).

3

Remove power knock outs (C).

4

Pass and secure the BX Main power cable (D) to the driver box (B) using fittings (by others). Make wire connections between the BX cable (D) and the driver (F) using the wire nuts (H).

5

Pass the plenum cable (G) (by others) from the fixture through the driver box (B) using fitting (by others). Make wire connections between the plenum cable (G) and the driver (F) using the wire nuts (E) (by others).

NOTE: Wire dimming conductors as Class 1

6

Reinstall cover (A) and secure it using the provided screws.
