

# RIM LINEAR PENDANT

## DESCRIPTION

Rim Linear combines generous ambient illumination with elegant geometry. The 2" high extruded aluminum frame is constructed with welded miter joint into a narrow, twin-rail form that can be connected to create continuous runs and painted in a wide range of standard and custom colors. The driver installs remotely, either above or below the ceiling.

Rim Linear is available in five sizes: 6"X24", 6"X48", 6"X60", 6"X72" and 6"X96". Nominal light output ranges from 1600 to 10800 lumens, with efficacy up to 84 lumens per watt. Rim Linear supports the full range of Chromawerx Sola, Duo, and Quadro options for tunable white and RGBW expressive color.

Rim is also available in Round and Square forms (see separate specification sheets).

# RIM LINEAR PENDANT

**IMPORTANT: a qualified DMX integration consultant is required to ensure proper installation and function of any DMX network**

## MOUNTING OPTIONS

### LCD - LINEAR CANOPY DRIVER BOX

LCD - Linear Canopy Driver Box - driver is in a 6 11/16" x 4 1/2" x 2" enclosure that also supports suspension and power cables. Enclosure is available in standard finishes (see ordering code).

WAC - White power cord + aircraft cable

### RDB - REMOTE DRIVER BOX

RDB - Remote Driver Box - driver is in a 20"x4"x2" enclosure with brackets for mounting to ceiling joists, runners, or other supporting members. The 6 1/2" x 4 1/2" x 7/8" wiring compartment canopy conceals and supports suspension and power cables. It is available in standard finishes (see ordering code). It can be installed in drywall or grid ceilings.  
Note: Support hardware is not supplied.

WAC - White power cord + aircraft cable

# RIM LINEAR PENDANT

## RIM LINEAR CONFIGURATION

Rim Linear can be installed as a single rectangular luminaire.  
Alternatively, connect the modules to form a distinctive, twin-rail linear luminaire, where each cell is fully illuminated.  
What's more, you can connect modules of different lengths to form a luminaire with a syncopated rhythm! Combined with Power-Over-Cable suspension, Rim Linear offers a fresh approach to ambient lighting in a linear form.

### Examples

#### Standard sections

#### Standard Configuration (8S)

#### Alternative Configuration (8A)

#### Standard Configuration (12S)

#### Alternative Configuration (12A)

## RIM LINEAR JOINER

Joiner features rigid die-cast construction for precise alignment. Cable suspension on modular spacing makes installation simple and clean.

Note that the location of the mounting points may vary  $\pm 2$  inches.

# RIM LINEAR PENDANT

## OPTIC

**Uniform Lambertian Optic (ULO)** - Thermoformed from impact-modified white PMMA, the ULO optic provides even luminosity, with up to 88% transmission. Combined with the LED array running around the inside of the housing, the open form and ULO optic create a widespread 50% direct and 50% direct light distribution with spacing criteria of 1.6.

### PERFORMANCE FOR 2S (6"X24")

LED output	Color Temp	Watts	Nominal Delivered Lumens	Efficacy LPW
low output	4000K	19	1600	84
medium output	4000K	29.5	2400	81
high output	4000K	39	3100	79

### PERFORMANCE FOR 4S (6"X48")

LED output	Color Temp	Watts	Nominal Delivered Lumens	Efficacy LPW
low output	4000K	34.5	2900	84
medium output	4000K	53	4300	81
high output	4000K	72	5700	79

### PERFORMANCE FOR 5S (6"X60")

LED output	Color Temp	Watts	Nominal Delivered Lumens	Efficacy LPW
low output	4000K	41.5	3500	84
medium output	4000K	64	5200	81
high output	4000K	87.5	6900	79

### PERFORMANCE FOR 6S (6"X72")

LED output	Color Temp	Watts	Nominal Delivered Lumens	Efficacy LPW
low output	4000K	50	4200	84
medium output	4000K	76.5	6200	81
high output	4000K	104	8200	79

### PERFORMANCE FOR 8S (6"X96")

LED output	Color Temp	Watts	Nominal Delivered Lumens	Efficacy LPW
low output	4000K	65.5	5500	84
medium output	4000K	100	8100	81
high output	4000K	136.5	10800	79

## Multiplier @ CRI90

CCT (K)	Watts	LPW
2700	1.09	0.92
3000	1.05	0.95
3500	1.02	0.98
4000	1.00	1.00
5000	0.94	1.07
6500	0.95	1.06

## CHROMAWERX - TUNABLE WHITE

Custom linear array of alternating color temperature mid-flux LEDs are mounted directly to the housing for optimal thermal performance. For the Duo products, a color temperature range from 2700K-6500K is achievable with color points on or below the black body curve. For the Sola products, a color temperature range from 2700K-3500K is controlled synchronously with intensity. Color consistency between fixtures is maintained within 3SDCM. LEDs are operated at a reduced drive current to optimize efficacy and lumen maintenance. All LEDs have been tested in accordance with IESNA LM-80-08 and the results have shown L80 lumen maintenance are greater than 60,000 hours. Absolute product photometry is measured and presented in accordance with IESNA LM-79, unless otherwise indicated.

**Chromawerx Sola** is a single-channel control that dims output while warming the color temperature in a pre-determined relationship. A simple digital or analog control sends a common signal to dual output digital drivers, which are programmed to adjust a specially populated LED array to emulate the effect of dimming a filament source. Dimming range is programmable, but the default option runs from 3500K at 100% full power to 2200K at 5% full power.

**Chromawerx Duo** is a two-channel control. It uses analog or digital protocols for synchronous control of both warm and cool LED arrays, enabling the user to set color temperature and light output. Commonly called "tunable white", Chromawerx two-channel control provides the range of warm (2700K) to cool (6500K) color that can be useful for helping to entrain circadian rhythms, stimulate alertness for improved educational and work productivity, and compensate for jet lag, among other applications. The Chromawerx drivers are programmed to limit maximum light output and power usage across all color temperatures.

# RIM LINEAR PENDANT

## ANSI C78.377-2015

### CHROMAWERX - RGBW

**Chromawerx Quadro** is a four-channel control that operates an RGBW LED array and addresses the need for more expressive color in architectural applications. The DMX driver supports familiar programming tools for both dynamic multi-hued color and precise white color point control. While a typical user interface will be a DMX controller by others, Lumenwerx also offers a simple control station for stand-alone color changing applications.

### ELECTRICAL REMOTE

All remote drivers are furnished with factory enclosure for recessed installation in drywall and grid ceilings.

### 0-10V (not available for Quadro)

Driver features factory-set adjustable output current with 120-277V AC line input. Dimmable from 100% to 1% with multiple control options. Rated life (90% survivorship) is 50,000 hours at 50°C max. ambient (and 70°C max. case) temperature. 0-10V 1% Driver performance at maximum load, efficiency > 84%, Power Factor > 0.9, THD < 20%. See ordering code for other specifiable drivers.

### DALI (not available for Quadro)

Factory-set, adjustable output current LED driver with universal (120-277VAC) input. Using an existing DALI control system (supplied by others), one control channel adjusts the fixture color temperature, and the other control channel adjusts fixture brightness. Dimming range from 100%-0%. At maximum driver load, efficiency < 86%, PF > 0.9, THD < 20%.

### DMX (Quadro & Duo only)

Factory-set, adjustable output current, multi-channel LED driver with universal (120-277VAC) input. Using DMX wall controls (optionally supplied by Lumenwerx) or an existing DMX control system, either two channels of LEDs (warm-white & cool-white) for Duo or four channels of LEDs (Red/Green/Blue/White) for Quadro are independently adjustable. Each DMX driver has multiple output channels that can be independently addressed at the factory or on-site using built-in RDM (Remote Device Management) functionality. Dimming range from 100%-0%. At maximum driver load, efficiency < 89%, PF > 0.9, THD < 20%.

### FINISH

**Interior** - 95% reflective, matte white powder coating

**Exterior** - Matte white, matte black or aluminum powder coating.

Custom finishes are also available.

### CONSTRUCTION

**Housing** - Housing and canopy are aluminum extrusion, wide variety of colored powder coating

**Diffuser** - Uniform Lambertian optic, co-extruded flexible polycarbonate satine finished lens.

### WEIGHT

**Rim Linear 2S (6"X24")** - 3.8lbs - 1.7kg

**Rim Linear 4S (6"X48")** - 7.4 lbs - 3.4kg

**Rim Linear 5S (6"X60")** - 8.5lbs - 3.8kg

**Rim Linear 6S (6"X72")** - 10lbs - 4.5kg

**Rim Linear 8S (6"X96")** - 13lbs - 5.8kg

### CERTIFICATIONS

**ETL** - Rated for Indoor Dry/Damp locations.

Conforms to UL Standard 1598 and certified to CAN/CSA Standard C22.2 No. 250.0.

# RIM LINEAR PENDANT

## WARRANTY

Lumenwerx provides a five-year limited warranty of electrical and mechanical performance of the luminaires, including the LED boards, drivers, and auxiliary electronics. Lumenwerx will repair or replace defective luminaires or components at our discretion, provided they have been installed and operated in accordance with our specifications. Other limitations apply, please refer to the full warranty on our website.

Wall controllers are covered by the manufacturer warranty.

### DMX WALL CONTROLLER - TUNABLE WHITE

#### Default DMX Addresses:

1. WARM | 2. COOL

#### WC

- (1) Power: Use this button to turn ON or OFF the fixture.
- (2) Brightness/CCT: Use the color/brightness toggle button to choose between color/brightness. When Blue: brightness is selected; when Yellow: color is selected.
- (3) Slider: Depending on the mode chosen in step 2, the slider will allow the user to set desired color or brightness.
- (4) Zone select: Up to 4 zones can be selected, either independently or together. Once selected, the commands will be sent to the zone identified by a Blue LED.

### DMX WALL CONTROLLER - RGBW

#### Default DMX Addresses:

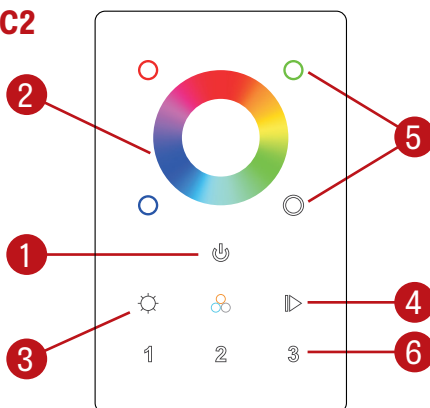

1. RED | 2. GREEN | 3. BLUE | 4. WHITE

#### WC1

- (1) Power: Use this button to turn ON or OFF the RGBW fixture.
- (2) Color Wheel: The wheel is used to rapidly select a color (RGB colors only).
- (3) Brightness (RGB): Hold down this button to either increase or decrease the brightness of the current RGB selection. White will not be affected by the RGB brightness button.
- (4) Color Cycle: This button will start an animation, rotating between reds, greens, and blues, the arrows allow the user to speed up or slow down the animation.
- (5) Individual Colors: By pressing and holding a color, it will be possible to brighten or dim it. Quickly pressing a color will either turn it OFF or turn it ON to its previous dim level. White: In order to activate or deactivate and dim the White channel, the White button needs to be used.
- (6) Scenes: By holding down one of the scenes button, the current color selection is saved. It can be later accessed by quickly pressing on one of the Scene buttons.

#### WC2

- (1) Power: Use this button to turn ON or OFF the RGBW fixture.
- (2) Color Wheel: The wheel is used to rapidly select a color (RGB colors only).
- (3) Brightness: Hold down this button to either increase or decrease the brightness of the current RGB selection. White will not be affected by the RGB brightness button.
- (4) Color Cycle: This button will start an animation, rotating between reds, greens, and blues, the arrows allow the user to speed up or slow down the animation.
- (5) Individual Colors: By pressing a color, it will be possible to brighten or dim that specific color. White: In order to activate or deactivate and dim the White channel, the White button needs to be used.
- (6) Zone: By holding down one of the zone buttons, a zone can be selected and controlled.
