

NOTE: Wire dimming conductors as Class 1

This product must be installed in accordance with the National Electrical Code and all applicable local codes, by a person familiar with the construction and operation of the product, and the hazards involved. proper grounding is required for safety.

Ce produit doit être installé suivant le code national de l'électricité, ainsi que tous les codes locaux applicables, par une personne familière avec la construction et le fonctionnement du produit, ainsi que tous les risques qui y sont associés. la mise à terre électrique est obligatoire pour la sécurité.

Rize SW, BIOSST, BIOSDY, Full Spectrum and SOLA are non-IC rated. Do not install with insulation directly on the fixture. Rize DUO is IC rated.

1

MASTER FIXTURE

Warning : A luminaire with more than one power supply connection means shall be connected to only one branch circuit.

2

Prepare the areas where the fixtures are going to be installed. Cut holes in the drywall according to the dimensions [*] in the client drawings. Tape and finish the edges of the drywall.

3

Make sure the power to the fixture (A) is turn off, the lens is installed on the fixture and protected by a cover. The spacer brackets (B) are in place, align with the obround holes of the flanges. Power feeds must be brought to the master fixture.

4

Install power cable (C) (by other) through the BX connector (D) (by other) and install onto the power plate (E) provided. Make electrical connections between power cable (C) and fixture cables using electrical marettes (F). Reinstall the power plate (E) to the fixture (A). **Number of wires may vary.**

5

To install the third power cable (G) (by other), repeat step 3. Insert the fixture into pre-cut hole in drywall.
Number of wires may vary.

6

Fasten drywall screws (H) through the obround holes of the flanges (I).

7

To reinforce the screws (H) that maintain the fixture in the drywall, wood blocking (J) or drywall anchors (K) must be used.

8

If the fixture position need adjustments, remove screws (H) on one side of the fixture (A) and adjust it. Reinstall the screws once the position is settled.

9

Once fixture is attached to the ceiling, remove the spacer brackets (B).

10

Plaster and sand over mud flange (I) to create a smooth finish.

11

Once the mud is totally dry and painted, gently remove the cover.

12

SATELLITE FIXTURE

The BX Cable (N) is a 6' BX Flexwhip with 2x 90° 3/8 quick knock out

13

Install the satellite fixture (K) in the same manner as the master fixture (A).

14

Bring the BX low voltage cable (M) that is already connected to the master fixture to the satellite fixture (K). Remove the power plate (L) and push the power knock out.

15

Make the connection between low voltage connector (P) to the satellite fixture's (M) quick connector (O). Install the BX connector (N) to the power plate (F). Reinstall the power plate (F) to the fixture (M).
