LUMENWERX

Revo Family

Versatile and streamlined, our Revo family delivers precise, textural, and comfortable task lighting for a variety of applications including above countertops, tables, and work stations to suit your daily needs.

Revo pendants may be relatively small ($2\frac{3}{8}$ " and $3\frac{3}{8}$ " in diameter), but they pack substantial power, equipped with low brightness reflectors and either a Miniature Reflector Optic (MRO) for the original Revo, or a Furrowed Glare Reduction Optic (FGRO) for Revo 3.

- 2 sizes & 2 optics
- 1100 lm/ft
- Circadian friendly
- UGR of <10 in Revo

Optics & Performance

With three beam angle options, 18 degrees, 35 degrees, 55 degrees Revo is the ideal choice for various applications. Unlike typical diffuser and prismatic optics, MRO offers a choice of narrow, medium, and wide downlight beams. The downlight MRO can be paired with a simple uplight optic, creating a comfortable and distinctive direct/indirect luminaire with a total of six light distribution options.

Miniature Reflector Optic - MRO

The LumenWerx Miniature Reflector Optic (MRO) locates individual, precisely molded Total Internal Reflector) TIR elements over each LED emitter, and further shields the source with precise parabolic reflectors.

Revo 3

Optics & Performance

Revo 3 comes in Direct/Indirect distribution only. The direct version uses our proprietary Furrowed Glare Reduction Optic (FGRO), an acrylic lens with ribbed, convex, glare-reducing lines to shape the light distribution into a smooth beam pattern, comfortable to the eye from many ranges of view. FGRO has impeccable transmission for a glare-reducing lens of 89%. The indirect uses our Clear Lambertian Optic (CLO).
