## PENDANT CABLE - CANOPY DRIVER - POWER OVER CABLES- INSTALLATION

8

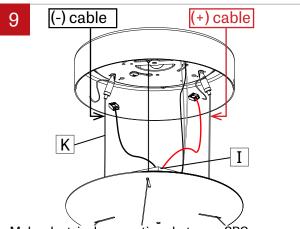

LUMENW										V					
W	W	W		L	U	Μ	Е	Ν	W	Е	R	Х		сo	Μ

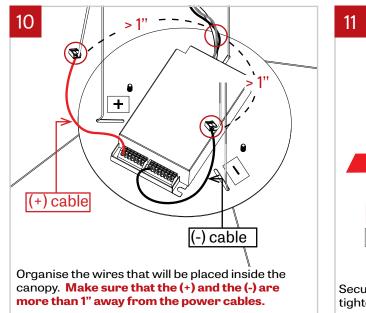

Pass all aircraft cables (G) through the canopy plate(C). Insert them into the grippers (F). Adjust the cables by pushing the feeder tube (F). Togo 36" and 48" have 4 wires.

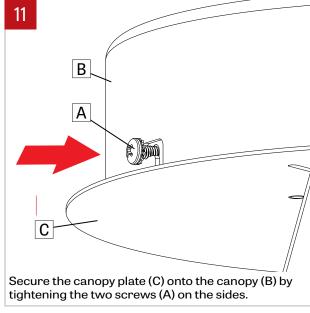

Make electrical connections between the driver (I) and the main power (J) with marettes (H). Push the wires inside the junction box (D).

Make electrical connections between SPC (suspension power over cable) (K) and the driver (I). <u>Notes:</u> Make sure that you are conecting the negative (-) aircraft cable (as mark on the fixture) to the black wire and the positive (+) aircraft cable (as mark on the fixture) to the red wire.
