DRYWALL TRIMLESS - INSTALLATION INSTRUCTIONS

LUMENWERX
WWW.LUMENWERX.COM

IMPORTANT: Installation instructions are shown with Via Perimeter 3 and applies to all Via Perimeter sizes

NOTE: Wire dimming conductors as Class 1

Reflector must be reinstalled with the screw and plastic washer that was originally supplied. If not, it can result in an electrical failure.

Make sure to reconnect the wires to the LED boards correctly.

1 SINGLE FIXTURE

Prepare the area and mark the mounting point location where the fixture is going to be installed according to the dimensions [*] in the client drawings.

2

Locate the J-Bar (A) position using provided client drawing. Install wall bracket to wall. Align with structural stud or use drywall anchors when needed. For sleeve adjustment, please refer to end-sleeve installation sheet.

3

Remove lens (B) from the fixture (C) with the included lens tool.

4

Disconnect LED moxex connector (D) by taking a pointed object and pressing on the two tabs on the top.

5

Unscrew and remove the cartridge (E) from the fixture.

6

Install power cable (F) (by other) through the BX connector (G) (by other) and install onto the power plate (H) provided. Make electrical connections between power cable (F) and fixture cables using electrical marettes (I). Reinstall the power plate (H) to the fixture (C).

7

Insert fixture (C) into pre-cut hole in drywall, aligning threaded rods (J) with holes in top of fixture (C). Put washers (K) and tighten nuts (L) to secure the fixture (C).

8

Adjust the fixture (C) to the threaded rods (J). On wall side, the fixture (C) must touch the J-Bar (A). On ceiling side, flange need to be flush with the tile (T).

9

UNFINISH CEILING - WALL BRACKET OPTIONAL

For extra support, use the supply wall bracket (Z) to fix the fixture (C) to the wall.

1. Screw the bracket (Z) to the fixture (C).
2. Screw the fixture (C) with the bracket (Z) to the wall.

10

Reconnect the LED connector (D) to the cartridge (E). Reinstall the cartridge (E) by **using a screw with plastic washer. Do not apply too much pressure.**

11

Reinstall the lens (B).

12 CONTINUOUS SYSTEM

Prepare the area and mark the mounting point location where the fixture is going to be installed, according to the dimensions [*] in the client drawings.

13

Locate J-Bar (A) position using provided client drawing. Install wall brackets to wall. Align with structural stud or use drywall anchors when needed. For sleeve adjustment, please refer to end-sleeve installation sheet.

14

Remove lens (B) from all the fixtures in the run with the included lens tool.

15

Disconnect LED mox connector (D) by taking a pointed object and pressing on the two tabs on the top.

16

Unscrew and remove the cartridges (E) from all the fixtures in the run.

17

Install power cable (F) (by other) through the BX connector (G) (by other) and install onto the power plate (H) provided. Make electrical connections between power cable (F) and first fixture cables using electrical marettes (I). Reinstall the power plate (H) to the first fixture (C).

24 UNFINISH CEILING - WALL BRACKET OPTIONAL

For extra support, use the supply wall bracket (Z) to fix the fixture (C) to the wall.
1. Screw the bracket (Z) to the fixture (C).
2. Screw the fixture (C) with the bracket (Z) to the wall.

25

Tighten the set screws (P) on both joining brackets (O) using Allen Key to secure the fixtures together.

26

Reconnect the LED connector (D) to the cartridges (E) correctly. Reinstall the cartridges (E) by **using a screw with plastic washer. Do not apply too much pressure.**

27

Reinstall the lenses (B) on all the fixtures.
