Join fixtures using align pins as guide. Put back in place the provided screw (Q) (using 3/16" Ball-End Screwdriver provided). Make sure that no wires are placed in between the extrusions, preventing the fixtures to be joined. Tight the screws (Q) on the top and bottom to pull the extrusions together. Repeat steps 10 to 12 for all others fixtures in the run.

Reinstall the cartridge (O and P) and reconnect the LED molex connector (N). **NOTE: connect blue** wire into the negative (-) terminal and the red wire into (+) positive terminal. Make sure that the wires are not hiding any LED diode. Screw the cartridge (P) back in place by using screw with plastic washer. Do not apply too much pressure.
