

NOTE: Wire dimming conductors as Class 1

1 REMOTE DRIVER BOX

Please refer to the remote driver installation sheet for more informations.

2

Adjust the cable length by cutting and stripping the fixture cable (A) to the desire length for the height of the fixture.

3

Make the electrical connection between the fixture cable (A) and the main power (B) with the marettes (C).

4

Fix the Cross bar (D) to the Junction box (E) using screws. Punch out the knock outs of the Canopy (F) to allow the conduits to fit.

5

Thread on the Decorative Nut (G) onto the threaded Cross bar to secure the Canopy (F)
